Hassan AL-sawlan

Software Developer

hasanalsolwn@gmail.com Saudi Arabia - Eastern Province hody.site

Summary

I got into programming with plans to pursue cybersecurity, but the deeper I got into writing code, the more I realized software development was what I truly enjoyed. Since then, I've been focused on learning new technologies and constantly improving my skills.

Skills

Programming Languages
Go, Javascript, Typescript, Python, C

Tech Stack
Vite, React, React Query, Next.js, Tailwind CSS, Express.js, Node.js, PostgreSQL, MongoDB, SQLite, RabbitMQ, Drizzle ORM

Infrastructure / DevOps
AWS, Docker, GitHub Actions (CI/CD), Kubernetes

Projects

ReelView December 2025 - Present
ReelView is a full-stack app for film lovers. I built it because I am a movie lover myself. In Reelview, you have a trending page, news, chat, and sharing reviews/movies
Github

Gator August 2025
Gator is a command-line blog aggregator. It lets multiple users register, follow their favorite feeds, and automatically collect new posts right from the terminal
